SKILLS

LANGUAGES

Python · SQL · R

DATA ENGINEERING

dbt · Airflow · Docker · GitHub Actions

DATABASES

MySQL · Snowflake · DuckDB

ANALYTICS & ML

scikit-learn · statsmodels · Pandas

VISUALISATION

Streamlit · Tableau · Plotly

SPORTS DATA

StatsBomb · Playwright

EDUCATION

B.Eng., Process & Environmental Eng.
University of Applied Sciences, Berlin

CERTIFICATIONS

Data Science Bootcamp
Rappert Technologies · Excel, SQL, Python, ML, Tableau, Docker, Git

Data Analytics
Google / DataCamp · SQL, PowerBI, R, dbt, Airflow, Snowflake

Sport Analytics — Communicating Data
Barça Innovation Hub

LANGUAGES

German	Native
English	Proficient (C1)
Spanish	Proficient (C1)

PROFILE

Data Analyst with 15 years of engineering experience across Europe, where data was always at the centre of the decisions that mattered. A significant part of my engineering career was building data-driven solutions for power plants: KPI dashboards, anomaly detection tools, and performance monitoring systems that delivered measurable efficiency gains and cost reductions for clients across Europe. That foundation shaped how I think about data: close to the problem, focused on impact. Now fully focused on analytics and data engineering, with expertise in SQL, Python, and pipeline tooling. Strong focus on data quality, storytelling, and translating business questions into evidence-based decisions.

PROJECTS

PlayerScore — Football Analytics Platform

player-score.streamlit.app ↗

Python · Playwright · Pandas · MySQL · Streamlit · GitHub Actions

- Scraped 9 seasons of Big-5 league data with Playwright; automated weekly refresh via GitHub Actions with zero manual intervention.
- Weighted benchmarking model scoring players vs. 95th percentile peers; live Streamlit app with FIFA-style cards, pizza charts, and similar-player finder.

EXPERIENCE

Development Engineer — Data & Digitization

03/2018 – Present

ALTEN Delivery Center · Barcelona

- Led 50+ engineering and data digitization projects in 3D modelling and process data management.
- Managed global rollout of new requirements software, leading a cross-functional team of 4.
- Coordinated with 3+ international teams, maintaining >97% on-time delivery rate.

Lead Project Engineer

08/2013 – 01/2018

BORSIG GmbH · Berlin

- Owned 10+ projects worth up to €5M, managing teams of up to 15 members end-to-end.
- Developed KPI dashboards and anomaly detection tools to monitor system performance and support data-driven decisions.
- Implemented client dashboards aligned with safety, quality, and cost goals — delivering 5–10% efficiency gains.

Senior Commissioning Engineer

08/2010 – 06/2013

MARTIN GmbH · Munich

- Commissioned large-scale energy plants across Europe; boosted plant energy efficiency by up to 10% through analytics-driven optimisations.
- Introduced software-based monitoring tools for live plant data tracking.
