

STEFAN HOFMANN

BUSINESS & DATA ANALYST · 15 YEARS CLIENT-FACING

Barcelona, Spain | +34 633 457 222 | stefan.hofmann.es@gmail.com |
twinanalytics.github.io

PROFILE

Business and data analyst with 15 years of client-facing experience in technical, project-driven roles. Skilled at gathering requirements, analysing data with Python, SQL and Excel, and turning it into clear insights and dashboards for non-technical stakeholders. Built a production football analytics platform covering more than 8,000 professional players across Europe's Big Five leagues. Fluent in German, English, and Spanish.

PROJECTS

PlayerScore

2025 – present

Personal Project · player-score.eu

- End-to-end football analytics platform covering more than 8,000 professional players across 11 seasons in Europe's Big Five: Python data pipeline, position-aware scoring model (0-1000 per position group), and a production web app with player comparison, similarity search, and age-curve analysis.
- Designed KPI frameworks translating raw event data into interpretable performance metrics for non-technical users: coaches, scouts, and analysts.

EXPERIENCE

Business Data Analyst

09/2026 – present

SCRM – Lidl Plus (Lidl International Hub), Barcelona

- Work closely with country managers and business stakeholders to identify critical metrics and KPIs, and turn them into actionable insights for decision-makers.
- Analyse complex datasets using statistical techniques (Python, SQL) to answer key business questions and surface trends and patterns.
- Build ongoing reports and dashboards (BI tools), translating business requirements into clear visualisations for non-technical audiences.

Development Engineer

03/2018 – 08/2026

MAN Energy Solutions (via ALTEN), Barcelona

- Delivered consultative presentations and structured reporting to senior stakeholders across international teams, translating complex technical data into actionable business decisions.
- Led global rollout of requirements management software (REQMAN), managing stakeholder coordination across multiple countries, data migration, and user training. Reduced bid effort by 20 to 30%.
- Managed 50+ projects with more than 97% on-time delivery across cross-functional engineering, IT, and analytics teams.

Lead Project Engineer

08/2013 – 01/2018

BORSIG GmbH, Berlin

- Primary client interface for 2 to 3 technical projects per year (300k to 1M EUR), running the full cycle from requirements gathering through delivery and stakeholder sign-off.
- Built and presented data-driven analyses and dashboards for non-technical decision-makers, achieving 5 to 10% cost and efficiency improvements across projects.

Senior Commissioning Engineer

08/2010 – 06/2013

MARTIN GmbH für Umwelt- und Energietechnik, Munich

- Commissioned approximately 10 large-scale plants across Europe, coordinating contractors and client stakeholders through full project lifecycle in multiple countries.
