

STEFAN HOFMANN

SENIOR ENGINEER & DATA ANALYST

Barcelona, Spain | +34 633 457 222 | stefan.hofmann.es@gmail.com | twinanalytics.github.io

PROFILE

Senior engineer with 15+ years of experience, now specialised in data analytics and building user-facing data products. Brings an engineer's instinct for systems thinking to every data problem, consistently translating technical complexity into decisions stakeholders can act on.

PROJECTS

PlayerScore

2025 – present

Personal Project · twinanalytics.github.io

- Built an end-to-end football analytics platform covering 6,800+ players across 9 seasons in Europe's Big-5 leagues: Python data pipeline, a role-aware scoring model (0–1000 per position group), and a web frontend, translating raw performance data into interpretable metrics for non-technical users.
- Enables player comparison, similarity search, and age-curve analysis across all positions through an intuitive web interface, no statistical background required.
- Built and iterated solo using AI-assisted development workflows, shipping a full-stack analytics product from data pipeline to deployed web app.

Data & AI Automation

2025

SAP Demand Intelligence (Contribution)

- Built a two-stage Python pipeline combining web scraping and GPT-3.5 to automatically extract structured funding and acquisition events from startup news articles and enrich company records with financial KPIs (revenue, profit margin, headcount).
- Replaced manual data collection with an automated, analysis-ready output, directly improving data quality for SAP's Demand Intelligence workflows.

EXPERIENCE

Development Engineer

03/2018 – present

MAN Energy Solutions (via ALTEN), Barcelona

- Analysed engineering and process data across 3+ international departments, translating findings into technical recommendations and decision-ready inputs for cross-functional teams and senior management.
- Led global rollout of requirements management software (REQMAN), managing a 4-person team and driving adoption across international stakeholder groups, reducing bid management effort by 20–30%.
- Managed 50+ engineering and data digitization projects with >97% on-time delivery, coordinating technical and non-technical stakeholders across time zones.

Lead Project Engineer

08/2013 – 01/2018

BORSIG GmbH, Berlin

- Managed 2–3 technical optimization projects per year for Waste-to-Energy power plants (€300k–€1M per project), serving as primary technical point of contact from discovery through delivery.
- Translated engineering data into business cases for non-technical decision-makers via custom dashboards (Excel and PowerPoint), achieving 5–10% cost and efficiency improvements.
- Led cross-functional teams of up to 15 engineers across client IT, operations, and management.

Senior Commissioning Engineer

08/2010 – 06/2013

MARTIN GmbH für Umwelt- und Energietechnik, Munich

- Commissioned ~10 large-scale energy plants across Europe; led 1 project as Lead Commissioning Engineer, coordinating multiple contractors and stakeholders across the full plant construction and go-live process.
- Boosted plant energy efficiency by up to 10% through analytics-driven performance monitoring and actionable optimization recommendations.
- Rolled out software-based live monitoring tools, translating raw plant data into operational insights for client operators and management.

EDUCATION & TRAINING

Data Science Bootcamp*Rappert Technologies, Berlin | 04/2024 – 10/2024*

Python, SQL, REST APIs, Tableau, scikit-learn, Pandas, GitHub

B.Eng. – Process & Environmental Engineering*University of Applied Sciences, Berlin | 2005 – 2010***Google Data Analytics Professional Certificate***Google / Coursera | 04/2026*

SQL, Python, Tableau, data preparation, analysis & visualization

TECHNICAL SKILLS

SQL Python REST APIs SAP MS Office (advanced) Tableau Power BI MS Azure
Streamlit GitHub AutoCAD Plant 3D Siemens NX*Generative AI:* LLM APIs (OpenAI, Anthropic Claude) Prompt Engineering
