STEFAN HOFMANN

Data Analyst | SQL · Python · Tableau

+34633457222 • stefan.hofmann.es@gmail.com • github.com/TwinAnalytics • Barcelona, Spain

Professional Summary

Data Analyst with 15 years of engineering experience, where data always drove the decisions that mattered. At BORSIG, built KPI dashboards and anomaly detection tools that delivered 5–10% efficiency improvements. Built PlayerScore — a fully automated analytics pipeline — from data ingestion to a live production application — demonstrating end-to-end ownership. Expertise in SQL, Python, and data pipeline tooling. Strong focus on data quality, storytelling, and translating business questions into evidence-based decisions.

Personal Projects

PlayerScore — Barcelona, Spain

https://player-score.streamlit.app/

Automated football analytics pipeline using Python, Playwright, Pandas, and Streamlit. Weekly refresh via GitHub Actions CI/CD.

- Scraped 9 seasons of player data across all Big-5 leagues using Playwright; automated weekly pipeline refresh via GitHub Actions.
- Built a transparent weighted benchmarking model scoring players against the 95th percentile of their position and season, no black box, every score is fully explainable.
- Deployed a live Streamlit application with role-based player scoring; system runs end-to-end without manual intervention.

Customer Shopping Behavior Analysis — Barcelona, Spain

Retail customer analytics using Python, MySQL, and Tableau — end-to-end from raw data to business insights.

- Cleaned and enriched a 3,900-row retail dataset in Python/Pandas; engineered customer segments (age groups, purchase frequency) and loaded into MySQL for analysis.
- Wrote 10 business SQL queries including CTEs, subqueries, and window functions (ROW_NUMBER PARTITION BY) to analyse revenue, discount impact, and customer loyalty.
- Built a Tableau dashboard visualising revenue by segment, top products, and subscription vs non-subscription spend patterns.

Experience

Development Engineer | Data & Digitization — Barcelona

ALTEN Delivery Center — 03/2018 - Present

- **Projects**: Led 50+ engineering and data digitization projects in 3D modeling and process data management.
- **Software Implementation:** Rolled out a new requirement software globally, managing a rollout team of 4.
- **Compressor Design: Applied thermodynamic calculations and 3D modeling for compressor engineering projects (MAN Energy Solutions / Everllence).**
- **Stakeholder Collaboration:** Coordinated with 3+ international teams, ensuring greater than 97% on-time delivery.

Lead Project Engineer — Berlin

BORSIG GmbH — 08/2013 - 01/2018

- **Project Leadership:** Led more than **10 projects** worth up to **€5M**, **managing teams** of up to **15 members**.
- **Data & Optimization: Developed KPI dashboards and anomaly detection tools to monitor system performance and support data-driven decisions.**
- **Client solutions:** Implemented **customer dashboards** aligning with safety, quality, and cost goals, leading to **5% - 10% cost/efficiency optimization**.

Senior Commissioning Engineer — Munich

MARTIN GmbH — 08/2010 - 06/2013

- **Projects:** Commissioned large-scale energy plants across Europe
- **Analytics:** Boosted **plant energy efficiency** by up to **10%** through **analytics-driven** optimizations
- **Software Rollout:** Introduced software-based monitoring tools for live plant data

Education

Bachelor of Eng., Process & Environmental Eng., University of Applied Science, Berlin

Certification

Data Science Bootcamp (Excel, SQL, Python, ML, Tableau, Docker, Git) — Rappert Technologies

Data Analytics, SQL, PowerBI, R/RStudio, dbt, Airflow, Snowflake — Google Analytics by Coursera, DataCamp

Sport Analytics - The Art of Communicating Data — Barça Innovation Hub

Languages

German Native | English Proficient | Spanish Proficient | Portugués Beginner

Technical Skills

Languages: SQL, Python, R/RStudio

Databases: MySQL, Snowflake

Data Engineering / Other: Git, GitHub, SAP, Tableau, Streamlit, PowerBI, Airflow, dbt, Data Pipelines, ETL/ELT, Data Modeling
